

OLAMIDE JOSHUA BANKOLE

New York, NY | (347) 602-2744 | obankole2007@gmail.com | linkedin.com/in/olamide-joshua-bankole

EDUCATION

University at Albany, State University of New York — Albany, NY Expected May 2028

Bachelor of Science in Electrical and Computer Engineering (ECE)

- **Relevant Coursework:** Data Structures & Algorithms, OOP, Signal Processing, Circuit Analysis, Digital Logic Design, Embedded Systems

TECHNICAL SKILLS

Languages: C, C++, Python, Java, MATLAB, JavaScript, TypeScript

Hardware & Analysis: Scopy Signal Analysis, Oscilloscopes, Function Generators, Custom Hardware Architecture, Circuit Troubleshooting

Tools & Frameworks: Git, GitHub, REST APIs, Linux/Unix, OpenClaw CLI, Ollama

Core Concepts: Data Structures & Algorithms, Systems Integration, Multithreading, Low-Latency Processing, Object-Oriented Design

TECHNICAL EXPERIENCE

Handshake AI Remote

AI Technical Trainer / Multimodal Data Evaluator June 2026 – Present

- Evaluated and validated generative AI models executing complex reference-to-image and video workflows.
- Applied systematic debugging and error-analysis frameworks to identify edge-case failures, latency bottlenecks, and output discrepancies.
- Provided structured feedback on algorithm performance to optimize prompt execution pipelines and model reliability.

PROJECTS & LAB EXPERIENCE

Word Ladder Game Engine (ECE Project) Fall 2026

- Developed a modular word ladder puzzle solver in C under strict constraints (explicit parameter passing, zero global variables).
- Implemented dictionary validation and single-letter transition verification using a 5,000+ word dataset.
- Designed a game loop handling prompt flows, 2D array ladder storage, duplicate-word termination, and input validation.

Hardware-Software Signal Processing Pipeline Spring 2026

- Executed real-time signal analysis using Scopy, oscilloscopes, and function generators for low-latency analog/digital flow.
- Wrote MATLAB scripts to automate data collection, perform frequency domain filtering, and validate signal integrity under dynamic loads.

Custom Local AI Gateway Integration July 2026

- Configured backend API gateways using OpenClaw CLI and Ollama to connect local open-weights LLMs to external APIs (Discord).
- Diagnosed low-level network socket/port connectivity issues and managed modular codebase with Git version control.

Interactive 3D Personal Portfolio Website September 2026

- Designed and deployed a personal portfolio showcasing engineering projects, featuring interactive Spline 3D web elements.
